١.	.This	opinion contains	s indications relating to the following items:
	$\boxtimes$	Box No. I	Basis of the opinion
•		Box No. II	Priority  Priority  A standard industrial applicability
		Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
•		Box No. IV	Lack of unity of invention
	$\boxtimes$	Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
		Box No. VI	Certain documents cited
		Box No. VII	Certain defects in the international application
		Box No. VIII	Certain observations on the international application

### 2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later. For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2005/000015

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Statement	,			
Novelty (N)	Claims	1 - 5		YES
Movelly (11)	Claims	None	7	40
Inventive step (IS)	Claims	3 - 5	· · ·	YES
mvomivo stop (15)	Claims	1, 2	]	NO
Industrial applicability (IA)	Claims	1 - 5		YES
	Claims	None		NO

#### 2. Citations and explanations:

The following documents identified in the International Search Report have been considered for the purpose of this written opinion:

D1: JP 54-038882 A 1.2

D2: JP 02-107167 A 1,2.

D3: WO 95/019916 A 1.2

### 1. Novelty and Inventive Step

The invention of claim 1 is a container for vacuum packing comprising a base panel and a front panel with an air hole, and claim 2 adds an embossment onto the base panel of claim 1 to define an air discharge path.

D1 discloses a container for vacuum packing, D2 discloses a container having a base panel and a front panel with an air hole, and D3 discloses a container having a base pane with a boss (24).

The prior art D1 to D3 do not individually disclose all the technical features of claims 1 and 2. However, it would be obvious to a person skilled in the art to simply apply the container of D2 to the vacuum packing of D1, thereby arriving at the invention of claim 1. Also, it would be obvious to a person skilled in the art to simply combine the teachings of D1 to D3, thereby arriving at the invention of claim 2.

Therefore, claims 1 and 2 satisfy the requirement of PCT Article 33(2) in respect of novelty, but do not satisfy the requirement of PCT Article 33(3) in respect of inventive step.

The juice storage of claim 3, the base panel adjustable in length of claim 4, and the guide panel of claim 5 are not disclosed in any of the prior art D1 to D3 and are not obvious to the person skilled in the art.

(Continued in Supplemental Box.)

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2005/000015

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of:

Box V.

Therefore, claims 3 to 5 satisfy the requirement of PCT Article 33(2)(3) in respect of novelty and inventive step.

2. Industrial Applicability

The inventions of claims 1 to 5 relate to a container for vacuum packing, which is constructed so that air is easily drawn from an interior to an open end of a vacuum bag, thus allowing food to be easily and hygienically vacuum packed. Therefore, claims 1 to 5 possess industrial applicability according to PCT Article 33(4).
